

The most important thing about Computing is connecting with others

We are informed about e-safety

We are confident in digital literacy

We are masters of technology

And it helps us to see a rapid changing world through technology's eyes

But most important thing about Computing is connecting with others

Pupil groups
Children coach and develop their own skills and developing first teaching.

Shine Bright and Reach for the Stars

A Approach.

A skills progression model allow for clear progression through all year groups and opportunities to revisit these allow all children to embed these. Discrete areas are taught with in year groups to ensure a fully balanced experience of both computing and digital literacy.

Engagement for learning

Computing engineers visit school and share experiences.
Coding expert areas
Stop motion animations

Computing

Connect with others

Core values

Trust E safety, understanding the importance of being safe online and thinking about what we share.

Skills for life

Accessing a strong technological world using word processing and developing technologies in our everyday life.

Star Challenge

Remove ceiling and enables self selection in challenge. Encourage culture of challenge. In this, highlighting the best practice.

Pupil Leadership

Assembly monitors Upper KS2, coaching and supporting in other groups.
