

YEAR 5			
	nd 6, pupils should be taught to use the following practical ls, processes and skills through the teaching of the programme	Vocabulary	
•	planning different types of scientific enquiries to answer questions, including recognising and controlling variables where necessary taking measurements, using a range of scientific equipment, with increasing accuracy and precision, taking repeat readings when appropriate recording data and results of increasing complexity using scientific diagrams and labels, classification keys, tables, scatter graphs, bar and line graphs using test results to make predictions to set up further comparative and fair tests reporting and presenting findings from enquiries, including conclusions, causal relationships and explanations of and degree of trust in results, in oral and written forms such as displays and other presentations identifying scientific evidence that has been used to support or refute ideas or arguments	plan variables measurements accuracy precision repeat repeats record data scientific diagrams labels classification keys tables scatter graphs bar graph line graph predictions further comparative and fair tests report and present conclusions casual relationships explanations degree of trust oral and written display presentation evidence support refute ideas arguments identify, classify and describe patterns systematic quantitative measurements	

## Programme of study, skills and vocabulary

	Autumn 1	Autumn 2	Spring 1	Spring 2	Summer 1	Summer 2
Α	Electricity	Living things and their habitats	Animals inc humans	Light	Revisit previous content	Living things and their habitats Evolution and inheritance
В	Earth and space	Earth and space	Forces	Animals inc humans	Properties and changes of materials	Properties and changes of materials

## **Stories**

Teaching science through stories | STEM

story-links-list.pdf

Book Lists for Primary Science Topics (booksfortopics.com)

diverse-representation-in-science-book-corner-suggestions-1.pdf

Goodnight Mister Tom
(Michelle Magorian)

Blackout
(John Rocco)

Hitler's Canary
(Sandi Toksvig)

Itch
(Simon Mayo)

Kensuke's Kingdom
(Michael Morpurgo)

The BFG
(Roald Dahl)

A Heart Pumping Adventure

Pig-Heart Boy

(Malorie Blackman)

Skellig

(David Almond)

HEART

Hair in Funny Places (Babette Cole) Giant (Kate Scott)

A Heart Pumping Adventure (Heather Manley)

You're Only Old Once!

The Enormous Turnip (Katie Daynes)

Leonardo's Dream (Hans de Beer)

The Skies Above My Eyes (Charlotte Guillain & Yuval Zommer)

George's Secret Key to the Universe

(Lucy and Stephen Hawking with Christophe Galfard)

The Way Back Home (Oliver Jeffers)

(Clare Helen Welsh)

 $The \ Aerodynamics \ of \ Biscuits$ 

Charlotte's Web

(E.B. White)

The Land of Neverbelieve

(Norman Messenger)

Mummy Laid an Egg (Babette Cole)

(Emma Carroll)

The Gruffalo's Child (Julia Donaldson)

The King Who Banned the Dark (Emily Haworth-Booth)

Beetle Boy

(M G Leonard)

Insect Soup (Barry Louis Polisar)

**Fur and Feathers** 

(Christopher Wormell)

The Molliebird (Jules Pottle)

Our Family Tree (Lisa Westberg Peters)

Job titles

01 stem-careers-by-topic-1.pdf

	Voy objectives	Specific skills	Vocabulani
Electricity	Key objectives associate the brightness of a lamp or the volume of a buzzer with the number and voltage of cells used in the circuit  compare and give reasons for variations in how components function, including the brightness of bulbs, the loudness of buzzers and the on/off position of switches  use recognised symbols when representing a simple circuit in	Specific skills Pupils might work scientifically by: systematically identifying the effect of changing one component at a time in a circuit; designing and making a set of traffic lights, a burglar alarm or some other useful circuit	appliances electrical circuit complete circuit circuit diagram circuit symbol components cell battery positive/ negative terminal connection loose connection short circuit wire crocodile clip bulb brightness switch buzzer volume motor conductor insulator voltage current resistance danger series circuit
□	a diagram.	F	
	Big question? What can change the	Famous names/inventions	
	brightness of a bulb?	Nikola Telsa -AC electric system	
		Alessandro Volta- Electrical Battery	
		Nicola Tesla- Alternating Currents	
		Edith Claute Flootnical ancincen	
	Key objectives	Edith Clarke -Electrical engineer Specific skills	Vocabulary
	describe how living things are classified into broad groups according to common observable characteristics and based on similarities and differences, including microorganisms, plants and animals  give reasons for classifying plants and animals based on	using classification systems and keys to identify some animals and plants in the immediate environment. They could research unfamiliar animals and plants from a broad range of other habitats and decide where they belong in the classification system	plants animals vegetable garden flower border reproduction plants- sexual, asexual animals- sexual life cycles- mammal, amphibian, insect, bird lifecycles around the world- rainforest, oceans, desert prehistoric similarities differences germination pollination stamen stigma
eir habitats	specific characteristics		organism micro-organism fungus mushrooms classification keys environment fish amphibians reptiles birds mammals vertebrates invertebrate
ir h	Big question? Why do polar bears have	Famous names/inventions	
nd the	white fur?	Jane Goodall- naturalist	
ings a		Sylvia Earle - Marine biologist	
Living things and th		Dr. Paula Kahumbu-wildlife conservationist	
		Mangala Mani - Antarctic scientist	
		Sir David Attenborough- Animal Behaviourist	
		Carl Linneus Classification	
		Libby Hyman Classification Invertebrates	

Animals inc humans	Key objectives identify and name the main parts of the human circulatory system, and describe the functions of the heart, blood vessels and blood  recognise the impact of diet, exercise, drugs and lifestyle on the way their bodies function  describe the ways in which nutrients and water are transported within animals, including humans.  describe the changes as humans develop to old age.  Big question? What is the most important body part?	Specific skills Pupils might work scientifically by: exploring the work of scientists and scientific research about the relationship between diet, exercise, drugs, lifestyle and health.  Pupils could work scientifically by researching the gestation periods of other animals and comparing them with humans; by finding out and recording the length and mass of a baby as it grows.  Famous names/inventions  Alexander Fleming- Penicillin  Louis Pasteur- Vaccination	Vocabulary circulatory system heart blood blood vessels pumps oxygen carbon dioxide lungs nutrients water diet exercise drugs lifestyle	
Animals		Eva Crane -Reproduction in Bees  Virginia Apgar- obstetrical anaesthesiologist  Leonardo Da Vinci- anatomy  Santorio Santorio-Anatomist  Dr. Katherine Dibb - Expert in		
		Cardiovascular Sciences  Justus von Liebig- Theories of Nutrition and Metabolism  Sir Richard Doll- Linking Smoking and Health Problems		
Evolution and inheritance	Key objectives recognise that living things have changed over time and that fossils provide information about living things that inhabited the Earth millions of years ago recognise that living things produce offspring of the same kind, but normally offspring vary and are not identical to their parents identify how animals and plants are adapted to suit their environment in different ways and that adaptation may lead to evolution.	Specific skills Pupils might work scientifically by: observing and raising questions about local animals and how they are adapted to their environment; comparing how some living things are adapted to survive in extreme conditions, for example, cactuses, penguins and camels. They might analyse the advantages and disadvantages of specific adaptations, such as being on two feet rather than four, having a long or a short beak, having gills or lungs, tendrils on climbing plants, brightly coloured and scented flowers.	Vocabulary evolution suited/ suitable adapted/ adaptation offspring characteristics vary/ variation inherit/ inheritance fossils	

	Big question?	Famous names/inventions	
	Why are there so many different living things on Earth?	Hippocrates -The Father of Medicine	
		Charles Darwin- Evolution	
		Alfred Russell Wallace - naturalist	
		Rosalind Franklin - DNA	
		Nettie Stevens - Geneticist	
		Professor Alice Roberts - Evolutionary biologist	
	Voy shipetiyes		Vocabulani
Light	key objectives recognise that light appears to travel in straight lines  use the idea that light travels in straight lines to explain that objects are seen because they give out or reflect light into the eye  explain that we see things because light travels from light sources to our eyes or from light sources to objects and then to our eyes  use the idea that light travels in straight lines to explain why shadows have the same shape as the objects that cast them.	Specific skills Pupils might work scientifically by: deciding where to place rear-view mirrors on cars; designing and making a periscope and using the idea that light appears to travel in straight lines to explain how it works. They might investigate the relationship between light sources, objects and shadows by using shadow puppets. They could extend their experience of light by looking a range of phenomena including rainbows, colours on soap bubbles, objects looking bent in water and coloured filters (they do not need to explain why these phenomena occur).	light travels straight reflect reflection light source object shadows mirrors periscope rainbow filters
Liši	Big question? What allows us to see?	Famous names/inventions Thomas Edison -Invented electric light bulb	
		Patricia Bath (BP website)- saving sight	
		Thomas Young (Wave Theory of Light)	
		Ibn al-Haytham -Light and our Eyes	
		Percy Shaw - The Cats Eye	
		Maria Telkes- Solar energy	

	Key objectives explain that unsupported objects fall towards the Earth because of the force of gravity acting between the Earth and the falling object identify the effects of air resistance, water resistance and friction, that act between	Specific skills Pupils might work scientifically by: exploring falling paper cones or cup-cake cases, and designing and making a variety of parachutes and carrying out fair tests to determine which designs are the most effective. They might explore resistance in water by making and testing boats of different shapes. They might design and make products that use levers, pulleys, gears and/or springs and	Vocabulary fall gravity force air resistance water resistance friction moving surfaces mechanisms levers pulleys gears magnetic force magnet attract
Forces	moving surfaces  recognise that some mechanisms, including levers, pulleys and gears, allow a smaller force to have a greater effect.  Big question?	explore their effects.  Famous names/inventions	
	Why do we fall?	Isaac Newton- Gravity Albert Einstein- The Theory Of relativity  Galileo Galilei - Gravity and Acceleration  Archimedes of Syracuse- Levers	
Properties and changes of materials	Key objectives compare and group together everyday materials on the basis of their properties, including their hardness, solubility, transparency, conductivity (electrical and thermal), and response to magnets  know that some materials will dissolve in liquid to form a solution, and describe how to recover a substance from a solution  use knowledge of solids, liquids and gases to decide how mixtures might be separated, including through filtering, sieving and evaporating  give reasons, based on evidence from comparative and fair tests, for the particular uses of everyday materials, including metals, wood and plastic demonstrate that dissolving, mixing and changes of state are reversible changes explain that some changes result in the formation of new materials, and that this kind of change is not usually reversible, including changes associated with burning and the action of acid on bicarbonate of soda.	Specific skills Pupils might work scientifically by: carrying out tests to answer questions, for example, 'Which materials would be the most effective for making a warm jacket, for wrapping ice cream to stop it melting, or for making blackout curtains?' They might compare materials in order to make a switch in a circuit. They could observe and compare the changes that take place, for example, when burning different materials or baking bread or cakes. They might research and discuss how chemical changes have an impact on our lives, for example, cooking, and discuss the creative use of new materials such as polymers, super-sticky and super-thin materials.	Vocabulary properties hardness solubility transparency conductive response to magnets dissolve liquid solution solute separate separating solids, liquids, gases filtering sieving evaporating reversible changes mixing evaporation filtering sieving melting irreversible conductivity insulation chemical opaque translucent rusting residue condensing

	_		
	Big question? Can anything be a solid, liquid and gas?	Famous names/inventions  Sir Humphrey Davy- Separating gases	
		Jamie Garcia (BP website)- Invention of a new plastic	
		Becky Schroeder - fluorescence material	
		Spencer Silver, Arthur Fry and Alan Amron - Post-It Notes	
	Key objectives	Ruth Benerito - Wrinkle-Free Cotton Specific skills	Vocabulary
Earth and space	describe the movement of the Earth, and other planets, relative to the Sun in the solar system  describe the movement of the Moon relative to the Earth  describe the Sun, Earth and Moon as approximately spherical bodies  use the idea of the Earth's rotation to explain day and night and the apparent movement of the sun across the sky.	Pupils might work scientifically by: comparing the time of day at different places on the Earth through internet links and direct communication; creating simple models of the solar system; constructing simple shadow clocks and sundials, calibrated to show midday and the start and end of the school day; finding out why some people think that structures such as Stonehenge might have been used as astronomical clocks.	Vocabulary Earth planets Sun solar system Moon celestial body sphere/ spherical rotate/ rotation spin night and day Mercury Venus Mars Jupiter Saturn Uranus Neptune Pluto 'dwarf' planet orbit revolve geocentric model heliocentric model shadow clocks sundials astronomical clocks
	Big question? Why does the Sun appear to	Famous names/inventions	
	move?	Dr Sian Proctor- Analog Astronaut  Margaret Hamilton- Computer scientist (Moon Landings)	
		Stephen Hawking- Black Holes	
		Mae Jemison – Astronaut	
		Claudius Ptolemy and Nicolaus Copernicus - Heliocentric vs Geocentric Universe	
		Neil Armstrong- First man on the Moon	
		Helen Sharman- GB astronaut	
		Caroline Herschel- First to find a comet	
		Valentina Tereshkova-Cosmonaut
