

YEAR 3				
Working scientifically During years 3 and 4, pupils should be taught to use the following practical scientific methods, processes and skills through the teaching of the programme of study content:	Vocabulary Focus 3/5 to be introduced 2023			
 asking relevant questions and using different types of scientific enquiries to answer them setting up simple practical enquiries, comparative and fair tests making systematic and careful observations and, where appropriate, taking accurate measurements using standard units, using a range of equipment, including thermometers and data loggers gathering, recording, classifying and presenting data in a variety of ways to help in answering questions recording findings using simple scientific language, drawings, labelled diagrams, keys, bar charts, and tables reporting on findings from enquiries, including oral and written explanations, displays or presentations of results and conclusions using results to draw simple conclusions, make predictions for new values, suggest improvements and raise further questions identifying differences, similarities or changes related to simple scientific ideas and processes using straightforward scientific evidence to answer questions or to support their findings. 	research- relevant questions scientific enquiry comparative and fair test systematic careful observation accurate measurements equipment – thermometer, data logger data- gather, record, classify, present record- drawings, labelled diagrams, keys, bar charts, tables oral and written explanations conclusion predictions differences, similarities, change evidence improve secondary sources guides, keys construct interpret

	Key objectives Identify common appliances that run	Specific skills Pupils might work scientifically by:	Vocabulary appliances electricity electrical circuit
	on electricity	observing patterns, for example, that	cell wire bulb buzzer danger electrical
		bulbs get brighter if more cells are	safety sign insulators wood rubber
	Construct a simple series electrical circuit, identifying and naming its	added, that metals tend to be conductors of electricity, and that some materials	plastic glass conductors metal water switch open closed components plug
	basic parts, including cells, wires,	can and some cannot be used to connect	motor mains
	bulbs, switches and buzzers	across a gap in a circuit.	
N.	Identify whether or not a lamp will		
icit	light in a simple series circuit, based		
ctri	on whether or not the lamp is part of		
Electricity	a complete loop with a battery		
	Recognise that a switch opens and		
	closes a circuit and associate this with		
	whether or not a lamp lights in a simple series circuit		
	Recognise some common conductors		
	and insulators, and associate metals with being good conductors.		
	Big question tbc	Famous names/inventions	
		Michael Faraday- Discovered	
		relationship between magnets	
		and electricity	
		Thomas Edison- Lightbulb	
		Joseph Swan- Incandescent	
		Light Bulb	

Sound	Key objectivesIdentify how sounds are made, associating some of them with something vibratingRecognise that vibrations from sounds travel through a medium to the earFind patterns between the pitch of a sound and features of the object that produced itFind patterns between the volume of a sound and the strength of the vibrations that produced it.Recognise that sounds get fainter as the distance from the sound source increases	Specific skills Pupils might work scientifically by: finding patterns in the sounds that are made by different objects such as saucepan lids of different sizes or elastic bands of different thicknesses. They might make earmuffs from a variety of different materials to investigate which provides the best insulation against sound. They could make and play their own instruments by using what they have found out about pitch and volume.	Vocabulary sound source noise vibrate travel solid liquid gas pitch tune high low volume loud quiet fainter muffle vibrations insulation instrument percussion strings brass woodwind tuned instrument	
	Big question tbc	Famous names/inventions Alexander Graham Bell - Invented the telephone Aristotle - Sound Waves Gailileo Galilei - Frequency and Pitch of Sound Waves		
Living things and their habitats	Key objectives Recognise that living things can be grouped in a variety of ways Explore and use classification keys to help group, identify and name a variety of living things in their local and wider environment Recognise that environments can change and that this can sometimes pose dangers to living things.	Specific skills Pupils might work scientifically by: using and making simple guides or keys to explore and identify local plants and animals; making a guide to local living things; raising and answering questions based on their observations of animals and what they have found out about other animals that they have researched.	Vocabulary environment flowering non-flowering plants animals vertebrate danger invertebrates- snails, slugs, worms, spiders, insects vertebrates- fish, amphibians, reptiles, birds, mammals plants – flowering plants, nonflowering plants population development litter deforestation	
	Big question tbc	Famous names/inventions		
		Jacques Cousteau -Marine Biology Cindy Looy-Environmental Change and Extinction Joean Beauchamp Procter Zoologist		

	Key objectives	Specific skills	Vocabulary
	Describe the simple functions of the	Pupils might work scientifically by:	nutrition vitamins minerals fat protein
	basic parts of the digestive system in	identifying and grouping animals with	carbohydrates fibre water skeletons –
	humans	and without skeletons and observing	support, protection skulls – brain ribs
		and comparing their movement;	 heart, lungs joint muscles-
	Identify the different types of teeth in	exploring ideas about what would	movement, pull, contract relax diet
5	humans and their simple functions	happen if humans did not have	
ans		skeletons. They might compare and	human digestive system mouth
Ë,	Construct and interpret a variety of	contrast the diets of different animals	tongue-mixes, moistens, saliva teeth:
μ	food chains, identifying producers,	(including their pets) and decide ways of	incisors- cutting, slicing canines-
Animals including humans	predators and prey.	grouping them according to what they	ripping, tearing molars-chewing,
ipn		eat. They might research different food	grinding oesophagus transports
ncl	Identify that animals, including	groups and how they keep us healthy	stomach acid enzymes small intestine large intestine carnivore herbivore
ls i	humans, need the right types and	and design meals based on what they find out	omnivore brush floss food chain Sun
na	amount of nutrition, and that they cannot make their own food; they get	lina out	producers prey predator
nir	nutrition from what they eat	Pupils might work scientifically by:	producers prey predator
A	nutrition from what they eat	comparing the teeth of carnivores and	
	Identify that humans and some other	herbivores, and suggesting reasons for	
	animals have skeletons and muscles	differences; finding out what damages	
	for support, protection and	teeth and how to look after them. They	
	movement.	might draw and discuss their ideas	
		about the digestive system and compare	
		them with models or images.	
-	Big question tbc	Famous names/inventions	
	how am I made?	· · · · · · · · · · · ·	
	now and made:	Marie Curie- Radiation

	Big question tbc what is beneath my feet?	Famous names/inventions Mary Anning- Fossil hunter	
		Dr Anjana Khatwa Geologist	
		Ursula Marvin- Geologist William Smith Fossils strata	
		Inge Lehrmasn -Earth's Mantle	
		Katia Krafft - Geologist and Volcanologist	
	Key objectives Recognise that they need light in order to see things and that dark is the absence of light Notice that light is reflected from surfaces	Specific skills Pupils might work scientifically by: looking for patterns in what happens to shadows when the light source moves or the distance between the light source and the object changes.	Vocabulary light see dark reflect reflective surface natural star Sun Moon artificial torch candle lamp translucent transparent
Light	Recognise that light from the sun can be dangerous and that there are ways to protect their eyes Recognise that shadows are formed when the light from a light source is blocked by a solid object		
	Find patterns in the way that the size of shadows change.		
	Big question tbc why can't I see in the dark?	Famous names/inventions	
	,	Justus Von Liebig Mirrors	
		James Clerk Maxwell (Visible and Invisible Waves of	
		Light)	
	Key objectives	Specific skills	Vocabulary
	Compare how things move on different surfaces Notice that some forces need contact between 2 objects, but magnetic forces can act at a distance	Pupils might work scientifically by: comparing how different things move and grouping them; raising questions and carrying out tests to find out how far things move on different surfaces	Force push pull open surface magnet magnetic attract repel magnetic poles north south metal iron steel
Forces and magnets	Observe how magnets attract or repel each other and attract some materials and not others Compare and group together a usaicty of guarday materials as the	and gathering and recording data to find answers their questions; exploring the strengths of different magnets and finding a fair way to compare them;	
Forces ar	variety of everyday materials on the basis of whether they are attracted to a magnet, and identify some magnetic materials Describe magnets as baying 2 poles	sorting materials into those that are magnetic and those that are not; looking for patterns in the way that magnets behave in relation to each other and what might affect this, for axample, the	
	Describe magnets as having 2 poles Predict whether 2 magnets will attract or repel each other, depending on which poles are facing.	what might affect this, for example, the strength of the magnet or which pole faces another; identifying how these properties make magnets useful in everyday items and suggesting creative	
		uses for different magnets.	

	Big question tbc	Famous names/inventions	
	why do some objects stick to my fridge but others don't?	Andre Marie Ampere- Electro-magnetism	
		The Wright Brothers Airplanes	
		Henry Ford- Cars	
Plants	Key objectives Identify and describe the functions of different parts of flowering plants: roots, stem/trunk, leaves and flowers explore the requirements of plants for life and growth (air, light, water, nutrients from soil, and room to grow) and how they vary from plant to plant investigate the way in which water is transported within plants explore the part that flowers play in the life cycle of flowering plants, including pollination, seed formation and seed dispersal.	Specific skills Pupils might work scientifically by: comparing the effect of different factors on plant growth, for example, the amount of light, the amount of fertiliser; discovering how seeds are formed by observing the different stages of plant life cycles over a period of time; looking for patterns in the structure of fruits that relate to how the seeds are dispersed. They might observe how water is transported in plants, for example, by putting cut, white carnations into coloured water and observing how water travels up the stem to the flowers	Vocabulary structure – flowering plants, roots, stem/ trunk, leaves, flowers function – nutrition, support, reproduction, makes own food requirements for life and growth – air, light, water, nutrients from the soil, room to grow, fertiliser life cycle - flowers pollination, seed formation, seed dispersal
	Big question tbc how does your garden grow?	Famous names/inventions Joseph Banks- Botanist <u>Ahmed Mumin Warfa</u> - Botanist Marianne North- Botanist
